

# LESCO®

## NOS PLUS

Slow Release Stabilized Nitrogen

### PRODUCT OVERVIEW

LESCO® NOS Plus is an advanced, slow release stabilized nitrogen fertilizer with industry-first dual mode of action technologies that releases nitrogen up to six months. Building on the benefits of LESCO NOS (Nitrogen Optimization System) with the added benefit of a proprietary polymer coating, this product maximizes nutrient efficiency, reduces environmental loss, and provides metered release of exclusive DCD (dicyandiamide)-infused stabilized nitrogen technology. LESCO NOS Plus may be used to assist with nutrient restrictions and blackout management.

### FEATURES

- Exclusive DCD-infused stabilized nitrogen technology reduces leaching and denitrification
- Stabilized nitrogen means less nitrogen loss to the environment for a sustainable greening solution
- Polymer coating and stabilized urea enhance efficacy and longevity per application

### SUGGESTED USAGE

Granular fertilizer can be applied to golf courses, residential and commercial turf, athletic fields and nurseries through a standard LESCO broadcast spreader.

### ENVIRONMENTAL TOLERANCE

Regardless of geography, this product may be used to enhance turf nutrition efficiency and greening with minimal environmental nitrogen loss and reduced labor requirements.

### BENEFITS

- Increased Nutrient Uptake and Efficiency
- Improved Greening Longevity
- Reduced Labor Needs
- High-Value Performance

#### ANALYSIS

- 45-0-0 | Standard SGN
- 45-0-0 | Mini SGN

\*Mini prill available in 2020

#### FORMULATION

Granular Fertilizer

#### MODE OF ACTION

Root Absorbed

#### RESTRICTED USE

No

#### PACKAGING INFORMATION

50 lb. bag
