

Revolutionary Nutrient Optimizing Technology

## FEATURES

- Maximizes turf recovery
- Enhances turf greening
- Increases nutrient uptake and utilization efficiency (improves return on current nutrient investment)
- Optimizes pH

## TURF ESTABLISHMENT GUIDELINES

Increases root mass and density via soil conditioning. Aids in seed establishment. Effective during nutrient restriction or blackout applications. Effective remediation of high saline soils.

## PRODUCT OVERVIEW

LESCO® CarbonPro™ – L with MobilEX™ is a revolutionary nutrient optimizing system that harnesses the power of plant-microbe interactions and organic soil processes to maximize plant health and nutrition. Through field testing, LESCO CarbonPro – L with MobilEX measured 50x more effective than Humic 6%.

## SUGGESTED USAGE

Multi-solution product can be tank mixed with most non-pesticide liquid applications. LESCO CarbonPro – L with MobilEX may be applied to residential turf, landscape plantings, golf course greens, tees and fairways, athletic fields, and nurseries.

## ENVIRONMENTAL TOLERANCE

Better root systems translate into greater tolerance from heat, cold, drought, salt, and mechanical agitation stresses. Assists turf in recovering from soil compaction due to high foot traffic. Fortifies turf's ability to survive prolonged winter effects.

Reduced Water Requirements

Increased Nutrient Availability

Optimized Soil Health

Unique Formulation

### ANALYSIS

- Microbial Metabolites
- Chelated Iron
- Humic Substances
- MobilEX™
- Nutrient Technology
- Kelp Extract

### FORMULATION

Biological Soil Amendment

### MODE OF ACTION

Root Absorbed

### RESTRICTED USE

No

### PACKAGING INFORMATION

1.0 and 2.5 gal.
